Ronjon Chakrabarti
Scientist and Project Manager

Ronjon Chakrabarti works as a Project Manager on topics related to climate change and energy, integrated water resource management, environmental infrastructure development, technology cooperation and participatory approaches.

His ventures for Indian ministries and corporations comprise advising and consultancy as well as organisation and management of expert delegations and capacity development for specialists and executives. He worked as a consultant for the GIZ environmental management programme in Hyderabad, India. His tasks were to advise the Andhra Pradesh Industrial infrastructure Corporation APIIC on developing eco industrial parks. Subsequently his activities were related to climate change mitigation studies in commercial and industrial sectors in India. Working intermittent in India and Germany his projects deal with water quality control and IWRM, energy efficiency and renewable energies as well as cleaner production and participatory environment management.

Ronjon Chakrabarti studied Environmental Engineering and Philosophy at the Technical University in Berlin, where he focused on water quality control and integrated water resource management. In his studies he further emphasized air quality control, hygiene, water supply and limnology and renewable energies. He did an internship at the water management company Compesa in Brazil.

In addition to his employment at adelphi he is writing his PhD Thesis on IWRM and surface water treatment solutions in rural areas.
