

## Events at the German Pavilion

### Tuesday, 23 May

- 11:30 am Regional approaches and use of market mechanisms (EnergieAgentur.NRW)
- 01:30 pm Capacity Building in Monitoring, ReV (verico SCE)
- 02:30 pm Negotiating at eye level: Carbon Markets at the GIZ Pre-COP trainings (GIZ Uganda)
- 03:00 pm Carbon taxes with domestic offset components (Wuppertal Institute)
- 04:00 pm Study launch: Emissions trading and the role of a long-run carbon price (ICAP)
- 06:15 pm **Main reception at the German Pavilion**

### Wednesday, 24 May

- 10:00 am Next-generation corporate climate action for impact toward the SDGs (Gold Standard)
- 10:30 am VCS-approved, India specific REDD+ methodology (GIZ India)
- 11:00 am New study: Updates of the Voluntary Carbon Market (adelphi)
- 11:30 am Innovative Financing for the Adaptation Fund: Pathways and Potentials (NewClimate Institute)
- 12:00 pm Will there be carbon trading in 2050? (Wuppertal Institute)
- 12:30 pm The International Climate Initiative (IKI) (BMUB)
- 01:00 pm Integrated Climate Finance (Perspectives)
- 01:45 pm Article 6 and renewable energy (Wuppertal Institute)
- 02:30 pm NDC Briefing Papers (GIZ)
- 03:00 pm Vulnerability of CDM projects for discontinuation of mitigation activities (DEHSt)
- 03:30 pm India Climate Responsibility Facility (GIZ India)
- 04:00 pm Linking CDM with Climate Finance - insights from practitioners and decision makers in Africa (Climate Focus / Perspectives / AREA)
- 04:30 pm Roundtable Discussion with accredited entity and project developers (Climate Focus / PCC / AREA)

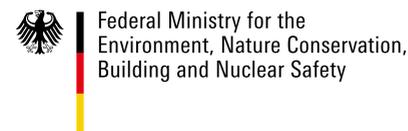

### Thursday, 25 May

- 10:00 am Combatting climate change by incentivizing the transformation of the nitric acid sector (NACAG)
- 10:30 am Strategic dialogue for NDC implementation and carbon tax experience (GIZ Chile)
- 11:00 pm Mobilising climate finance flows in line with the Paris Agreement: new nordic finance approaches and opportunities (NewClimate Institute)
- 11:30 am Innovative MRV solutions for transparency in climate finance and NDCs (verico SCE)
- 12:00 pm Collaboration to accelerate progress to the SDGs (Gold Standard / UNFCCC)

The Federal Ministry for Economic Cooperation and Development (BMZ) is responsible for the German development cooperation. BMZ is supporting climate action in through bilateral programs in over 60 partner countries to jointly achieve the goals of the 2030 Agenda and the Paris Agreement. BMZ accounts for approximately 90 per cent of Germany's international climate finance.

[www.bmz.de/en](http://www.bmz.de/en)

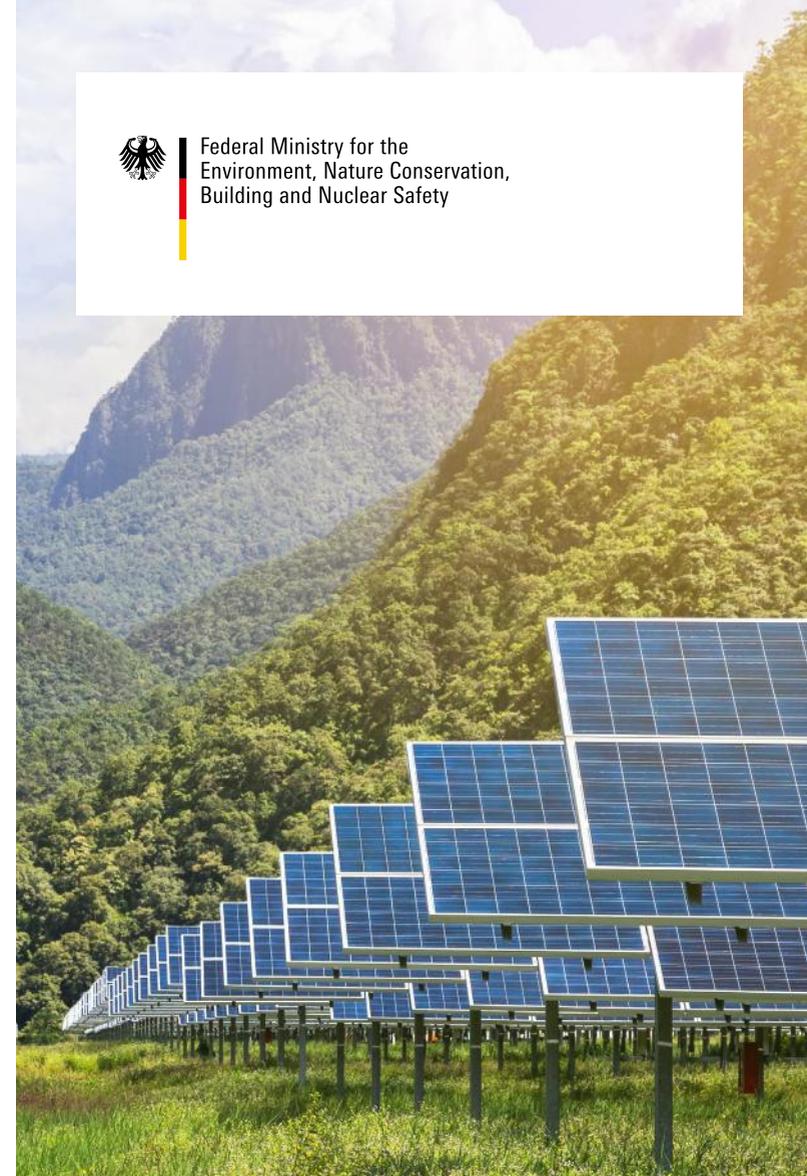

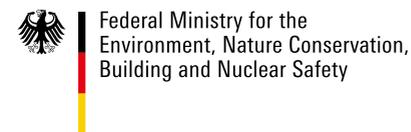

The Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) is responsible for a range of government policies which are reflected in the name of the ministry itself. For more than 30 years the Ministry has worked to protect the public from environmental toxins and radiation and establish an intelligent and efficient use of raw materials; it has advanced climate action and promoted a use of natural resources that conserves biodiversity and secures habitats. BMUB is responsible within the German government for climate policy on the national, European and international levels. Its activities range widely from domestic climate policy to the international climate negotiations under the UNFCCC. Germany is taking an active role in realizing the agreed commitments by enhancing its own activities and supporting other parties in their efforts to mitigate and adapt to the impacts climate change.

INNOVATE4CLIMATE | Barcelona 2017

## Advancing carbon markets and climate finance worldwide

Germany actively supports the international dialogue on carbon markets and climate finance in a variety of forums.

The Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) is at the core of Germany's activities in the fields of carbon markets and market mechanisms for climate action. With the German Emissions Trading Authority (DEHSt) at the German Environment Agency and the International Carbon Action Partnership (ICAP) as well as various other initiatives and projects BMUB is advancing knowledge, strategies and initiatives for climate mitigation worldwide.

Climate action and international development policy are inextricably linked. This is why the Federal Ministry for Economic Cooperation and Development (BMZ) seeks to support developing and newly industrialising countries to undertake measures that contribute to climate change mitigation and adaptation to the consequences of climate change. To this end, public funds are deployed in ways that reduce greenhouse gas emissions and increase climate resilience.

At the Innovate4Climate, we are jointly hosting the German Pavilion at the Innovate4Climate where exhibitors will be showcasing German carbon and climate finance policies and services. Interested visitors are welcome to visit the individual booths where representatives of the participating organisations and institutions will provide more information and be open for your questions and discussions.

Representatives of BMUB and BMZ will be present at the German Pavilion and share insights on the Art. 6 negotiations, new perspectives on emerging climate finance approaches and opportunities, the International Climate Initiative (IKI), the Clean Development Mechanism (CDM) and its relation to climate finance as well as the future role of carbon pricing and emissions trading.

## Side Events

[The status and prospect of project based mitigation activities after Paris](#)

Convenor: German Emissions Trading Authority (DEHSt)  
Monday, 22 May 2017 | 03:30-06:30 pm | Room 4

[Scaling-up renewables: instruments for mobilizing private climate finance in developing countries](#)

Convenor: BMZ  
Tuesday, 23 May 2017 | 09:00-10:00 am | Room 8

[The Nitric Acid Climate Action Group: paving the way for a sector-wide transformation](#)

Convenor: BMUB  
Tuesday, 23 May 2017 | 05:15-06:15 pm | Room 3

# German Pavilion, Booth Number A102

## FutureCamp Climate

Since 2001, FutureCamp provides strategic and operational consulting services with focus on climate, energy and environment. Main areas of expertise are analysis, elaboration and implementation of ETS design elements, global climate governance, market-based mechanisms, carbon trading, GHG footprints and offsetting.

[www.future-camp.de](http://www.future-camp.de)

## TÜV NORD CERT

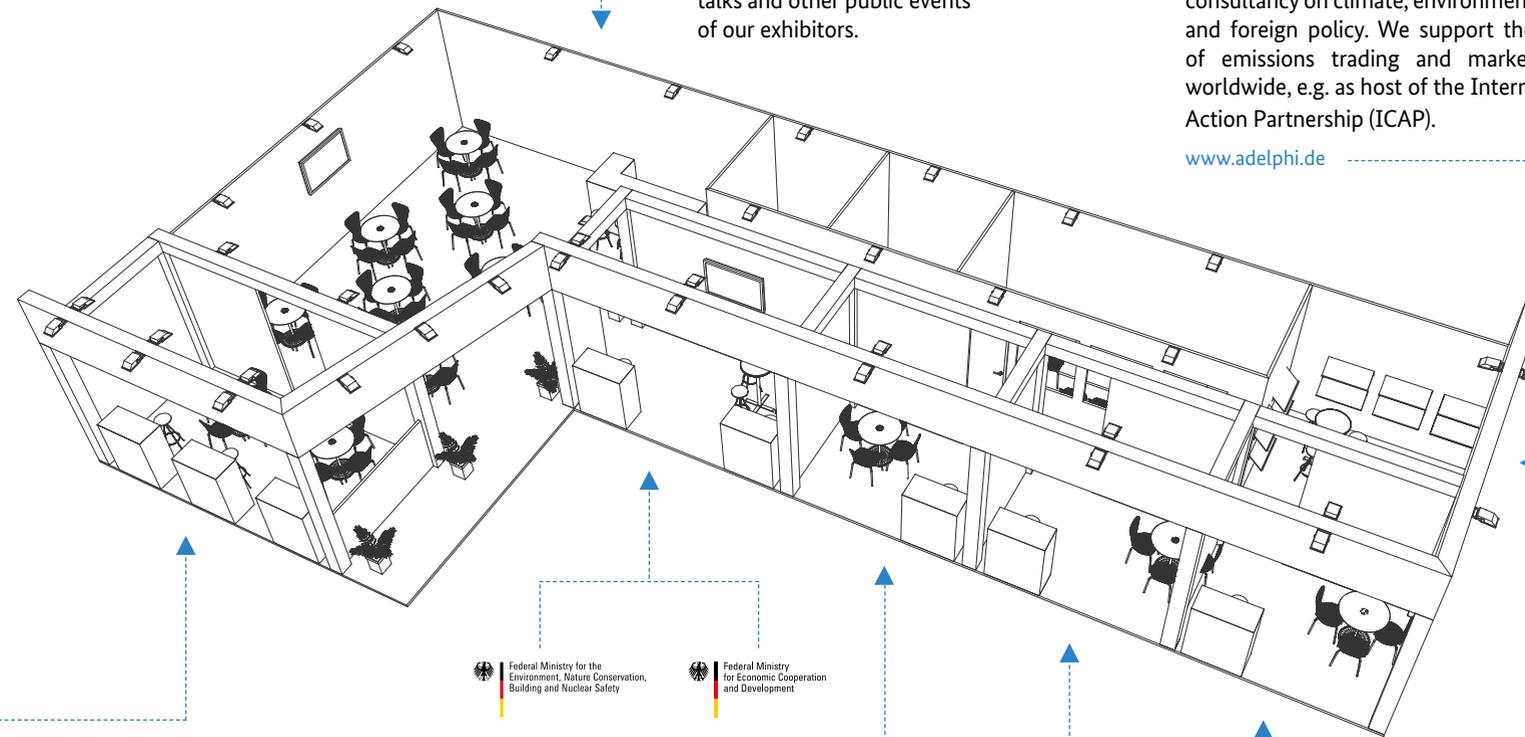

TÜV NORD CERT is a worldwide active Designated Operational Entity (DOE) accredited under the UNFCCC for all sectoral scopes. Our experts have carried out validations and verifications for more than ten years. Further TÜV NORD CERT is also active in all kinds of voluntary carbon markets.

[www.tuev-nord.de](http://www.tuev-nord.de)

## verico SCE

verico SCE is a European cooperative with members from several EU member states, all of them being small enterprises or freelancers with expertise in monitoring, reporting and verification (MRV) of GHG emissions, sinks and reductions. Besides accredited verification services under EU-ETS and the certification of energy management systems their special focus is on consulting services and capacity building measures when establishing MRV regulations in emerging carbon markets or carbon tax systems.

[www.verico.eu](http://www.verico.eu)

## German Pavilion Lounge

Come here for presentations, talks and other public events of our exhibitors.

## adelphi

adelphi is a Berlin based think tank and public policy consultancy on climate, environment, development and foreign policy. We support the development of emissions trading and market mechanisms worldwide, e.g. as host of the International Carbon Action Partnership (ICAP).

[www.adelphi.de](http://www.adelphi.de)

## Climate Focus

Climate Focus is a pioneering international advisory company committed to the development of measures that mitigate and adapt to the impacts of climate change, across a range of sectors including energy, forestry, agriculture, waste, and transport.

[www.climatefocus.com](http://www.climatefocus.com)

## Gold Standard

Established by WWF in 2003, Gold Standard is a best practice standard and certification body that works to catalyse more ambitious climate action. Its holistic standard, Gold Standard for the Global Goals, enables climate and development activities to maximise, quantify and certify their impacts toward the UN Sustainable Development Goals.

[www.goldstandard.org](http://www.goldstandard.org)

## NewClimate Institute

The NewClimate Institute raises ambition for action against climate change through research, policy design and knowledge sharing. We evaluate and design market mechanisms, to support the successful transition from existing to emerging mechanisms.

[www.newclimate.org](http://www.newclimate.org)

## Perspectives GmbH

Perspectives is a research and consulting firm with more than 20 years of experience in climate policy, climate finance and carbon markets. We offer high quality advice and customized solutions for the CDM, NAMAs, NDCs, Paris Mechanisms and UNFCCC negotiations.

[www.perspectives.cc](http://www.perspectives.cc)

## German Emissions Trading Authority (DEHSt)

The German Emissions Trading Authority (DEHSt) at the Federal Environment Agency is the national authority for the implementation of the European Emissions Trading System for both stationary installations and aviation.

[www.dehst.de](http://www.dehst.de)

## Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)

We are a German federal enterprise and offer workable, sustainable and effective solutions in political, economic and social change processes. Our wide range of services is based on a wealth of regional and technical expertise and on tried and tested management know-how.

[www.giz.de](http://www.giz.de)

## EnergyAgency.NRW

The EnergyAgency.NRW is an independent, non-commercial contact for any inquiry concerning energy efficiency, emissions trading and renewable energy in North Rhine-Westphalia, Germany. It works on behalf of the regional government.
