Federal Ministry for the
Environment, Nature Conservation,
Building and Nuclear Safety

The German Federal Ministry for the Environment (BMUB) and the German Emissions Trading Authority (DEHSt) are again hosting a German Pavilion.

The joint appearance of exhibitors will be showcasing German carbon policies and services. Interested trade visitors are welcome to visit the individual booths where representatives of the participating organisations and institutions will be available for talks and discussions on the various topics pertaining to their area of expertise.

Furthermore, representatives of BMUB and DEHSt will be present at the German Pavilion and available for interviews and talks e.g. on the European Emissions Trading System (EU ETS), Joint Implementation (JI) and Clean Development Mechanism (CDM).

CARBON EXPO Barcelona 2015

Advancing carbon markets - Germany's activities worldwide

The Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) is the department of the German government in charge of climate change policies, including all policy-related responsibilities on the carbon market. These comprise the provision of the legal framework in Germany, cooperation with host countries, conceptual developments of CDM and JI as well as New Market Mechanisms and emission trading systems at European and international level.

The German government's CDM/JI Initiative focuses on one hand on large emerging economies and developing countries like China and India. On the other hand, it cooperates with middle income countries in the MENA region (Middle East and North Africa) and has a growing portfolio of activities in Sub-Saharan African Least Developed Countries (LDCs). From 2013 onwards, the focus of CDM activities will lie on LDCs, while in other countries the relevance of New Market Mechanisms will be explored. In this context, the German government is working to create networks with host countries, the aim being to nurture close and regular contacts with government agencies, local businesses and other actors.

The BMUB is one of the donors for the PMR (Partnership for Market readiness) and engaged in discussion on market mechanism in this and other contexts. Additionally, the promotion of the programmatic CDM and JI is one of the key activities of the CDM/JI Initiative. This is complemented by development and promotion of standardised baselines. The PoA approach is in itself part of the reformed CDM and also fit to provide a bridge from CDM to more encompassing New Market Mechanisms and Nationally Appropriate Mitigation Actions (NAMAs).

Finally the BMUB is closely following the developments in the existing CDM portfolio as well as in the pipeline with a view to examining political options in the current period of scarce demand.

Exhibitors

adelphi

adelphi is a Berlin-based think tank and public policy consultancy on environment, development, and foreign policy. We support the development of emissions trading and new market mechanisms worldwide, e.g. as host of the International Carbon Action Partnership (ICAP).

www.adelphi.de

Climate Focus

Climate Focus is a pioneering international advisory company committed to the development of measures that mitigate and adapt to the impacts of climate change, across a range of sectors including energy, forestry, agriculture, waste, and transport.

www.climatefocus.com

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)

As a German federal enterprise, the GIZ offers workable, sustainable and effective solutions in political, economic and social change processes. Our wide range of services is based on a wealth of regional and technical expertise and on tried and tested management know-how.

www.giz.de

EnergyAgency.NRW

The EnergyAgency.NRW is an independent, non-commercial contact for any inquiry concerning energy efficiency, emissions trading and renewable energy in North Rhine-Westphalia. It works on behalf of the regional government.
